patent pending

Raise value without adding opacity

## MiYO Color

Translucent, semi-translucent and opaque self-glazing colors  
that don't run or puddle

sintered zirconia

MiYO Color wet

MiYO Color fired

Patent pending materials allow users to float color on top of wet color without mixing, so that every detail imaginable can be achieved in one application

before firing

MiYO Structure Window was used to detail shape and texture (before firing)

# MiYO Structure

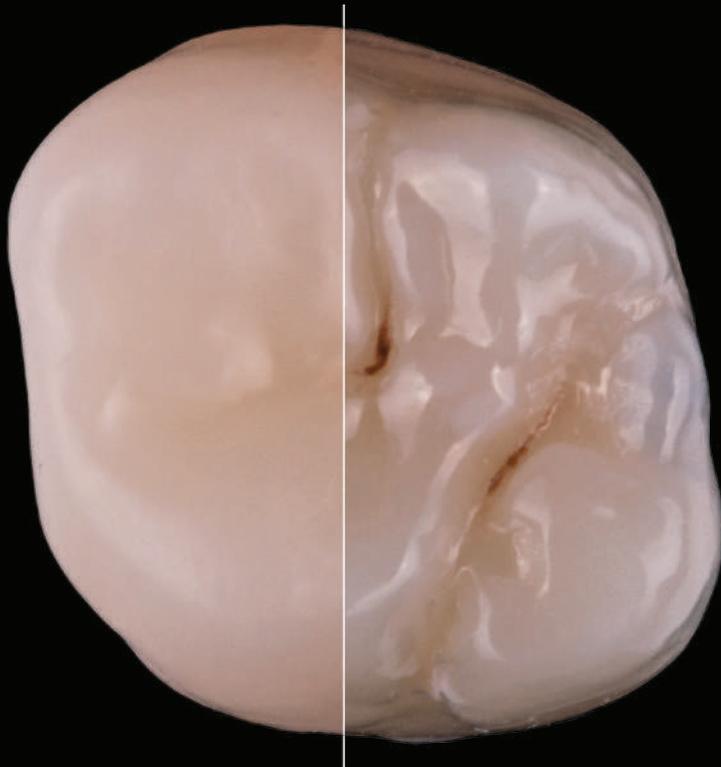

Structure building materials in varying colors and translucency for the purpose of building shapes or detailing surface texture, for teeth and tissue

after firing

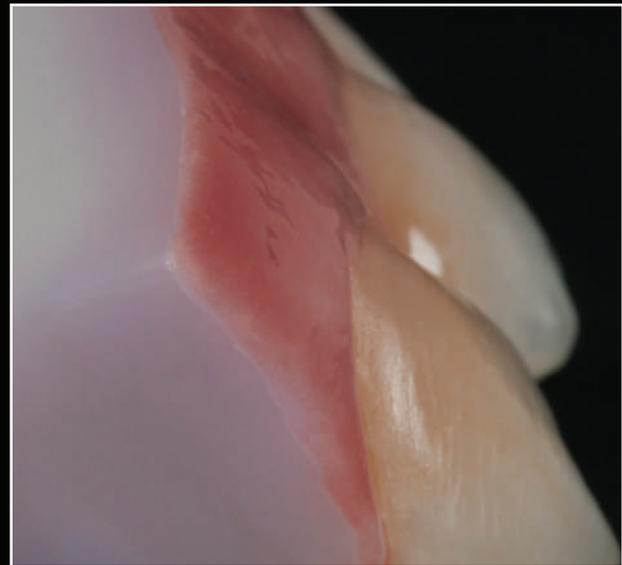

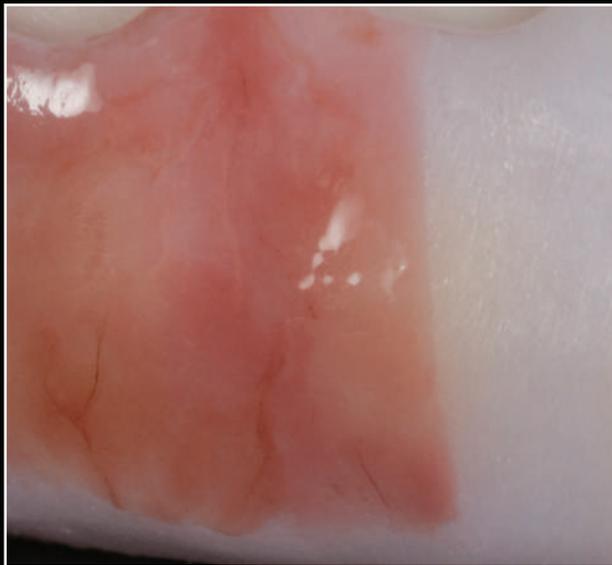

All details faithfully preserved and fully glazed

# No Cutback

Achieve depth, translucency and effects in 0.1 – 0.2mm with MiYO Color & Structure
